SUMMARY

Highly motivated 3rd-year Computer Science student with hands-on experience building and deploying end-to-end data applications. Proficient in Python, SQL, and Machine Learning, with a proven ability to extract actionable insights from complex datasets. Skilled at developing interactive dashboards using Streamlit and Power BI, and deploying live web applications via cloud platforms like Vercel. Seeking a Data Science or Data Analyst Internship to leverage my technical skills to solve real-world business problems.

EDUCATION

B.TECH | KL University 2024
Hyderabad, Telangana

INTERMEDIATE (12th Grade) Sri Chaitanya Junior College 2022 – 2024
Percentage: 87% Hyderabad, Telangana

SSC (10th Grade) - Sri Sai Siddhartha School 2010 – 2022
CGPA: 8.3 Hyderabad, Telangana

SKILLS

Programming & Databases: Python, SQL
Data Analysis & ML: Pandas, NumPy, Scikit-learn
Visualization & BI: Streamlit, Plotly, Power BI
Tools: Git, GitHub, VS Code, Vercel,

PROJECTS

E-commerce Business Analytics Dashboard | Live App | GitHub
Python, Streamlit, SQL, Scikit-learn, Plotly
- **Source Code**: https://github.com/suryasreemanth01-ux/ecommerce-analytics-dashboard
- "Built and deployed a live interactive dashboard to analyze **2,000+** e-commerce records, reducing manual reporting time"
- Engineered a SQLite database and executed **5+** complex SQL queries to aggregate regional and product performance
- Integrated a Scikit-learn Linear Regression model to forecast future revenue trends using Plotly charts.
- Enabled dynamic sidebar filtering and dynamic CSV report exports based on user selections.

Customer Churn Prediction
Python, Pandas, Matplotlib, Seaborn, Scikit-learn
- Analyzed customer data to identify key factors contributing to customer churn.
- Performed data cleaning, exploratory data analysis, feature preparation, and data preprocessing.
- Developed Machine Learning models using Logistic Regression and Random Forest algorithms.
- Evaluated model performance using accuracy, precision, recall, and other classification metrics.
- Visualized customer behavior patterns and interpreted model results to identify important churn factors.

Job Market Data Analysis

Revenue Intelligence Platform
Next.js,Tailwind CSS, Supabase
- **Source Code**: https://github.com/suryasreemanth01-ux/Revenue-Intelligence-Platform
- Developed a web-based platform to help B2B businesses monitor account health, identify churn risks, and spot expansion opportunities.
- Built a responsive dashboard displaying key metrics, including total accounts and a visual risk distribution overview (High, Medium, Low).
- Engineered a data table to display critical account signals across **8+** enterprise accounts
- Deployed the frontend application using Vercel for fast, reliable hosting.
